

Week 9 Report

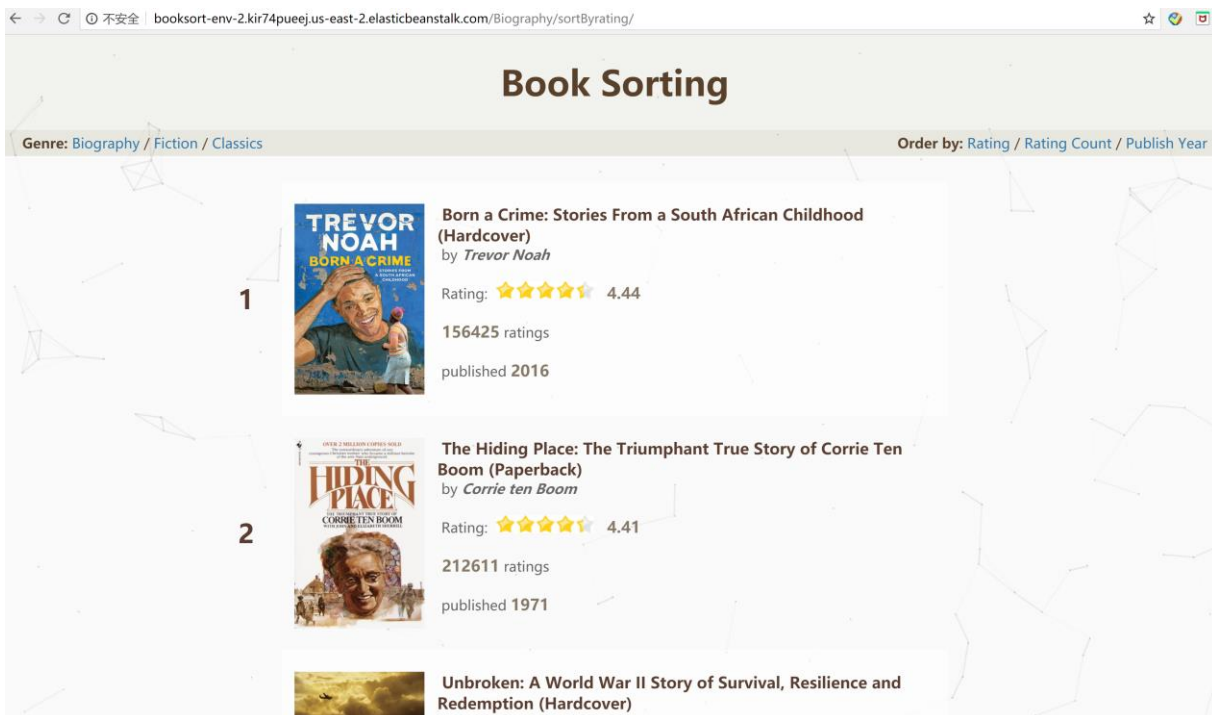

In this week,

1. I add the function that it will automatically show the detail of selected book that user point to but not clicked. Shown as below:

When user move mouse out of this cover, the detail page will disappear.

2. I changed the background. The JavaScript file from: <https://cdn.bootcss.com/canvas-nest.js/1.0.1/canvas-nest.js>

Problem:

1. Cannot figure out the JavaScript as the background that I want to.

Solution: search on the Internet and find a JavaScript file to achieve it.

<https://github.com/hustcc/canvas-nest.js/blob/master/README-zh.md>

In the next week, I will:

1. Collect the brief introduction of books from *Goodreads* (<https://www.goodreads.com/>).
2. Add the brief introduction to the part of books. In addition, when user move over to the cover of book, the introduction will automatically show up.
