

## Week 6 Report

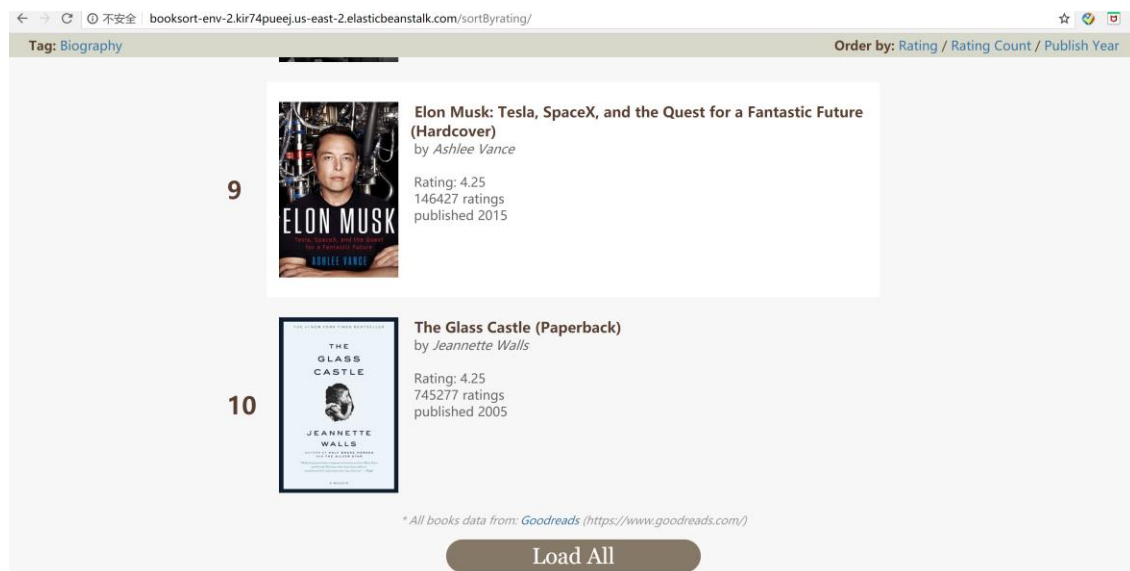

In this week,

**\*Important:** There was a bill problem on the server I used before, so I have to use a new one and the URL of my project is changed. The **new URL** is: <http://booksort-env-2.kir74pueej.us-east-2.elasticbeanstalk.com/>

1. I added the link of each book that is the detailed page on the *Goodreads* (<https://www.goodreads.com/>). When move the mouse above the book cover and the title of the book, you can see a pointer finger and the different color of the text of the book name, and you can click it then go to see the detail of book. Shown as below:

2. I added the function to the button “Load All”, that is, after click it, users can see all 40 books and there are only 10 books shown without click “Load All”.
3. I fixed the navigation bar on the top even if user scroll to the bottom so that user can see and choose the order of sorting. Shown as below:

4. I added a transaction on the moving of the button “Load All”, shown as below:

10

JEANNETTE  
WALLS  
AUTHOR OF HALF-BROKEN HEART  
AND THE SILVER STAR  
"Walls has joined the company of authors such as Mary Karr  
and Frank McCourt who have been able to  
combine their own lives with fiction." —*Rolling Stone*  
A WEIRDO

Rating: 4.25  
745277 ratings  
published 2005

*\* All books data from: [Goodreads](https://www.goodreads.com/) (https://www.goodreads.com/)*

**In the next week, I will:**

1. Add a button of “Back Top”. User can go back to the top of the page whenever they want.
2. Add one more genre of books, and user can choose between these genres. Those books are from *Goodreads* (<https://www.goodreads.com/>).
