# Week 9 Report

In this week,

1. I add the function that it will automatically show the detail of selected book that user point to but not clicked. Shown as below:

When user move mouse out of this cover, the detail page will disappear.

2. I changed the background. The JavaScript file from: https://cdn.bootcss.com/canvas-nest.js/1.0.1/canvas-nest.js

In the next week, I will:

1. Collect the brief introduction of books from *Goodreads* (https://www.goodreads.com/).

2. Add the brief introduction to the part of books. In addition, when user move over to the cover of book, the introduction will automatically show up.
